

J. K. Press

Journal Name:	Asian Journal of Mathematics and Computer Research
Manuscript Number:	Ms_AJOMCOR_11827
Title of the Manuscript:	Scattering for the supercritical generalized KdV equation
Type of the Article	Short Research Article

1: Review Comments

	Reviewer's comment	Author's feedback
<p><u>Compulsory</u> REVISION comments</p> <ol style="list-style-type: none">1. Is the manuscript important for the scientific community? (Please write a few sentences on this manuscript)2. Is the title of the article suitable? (If not please suggest an alternative title)3. Is the abstract of the article comprehensive?4. Are subsections and structure of the manuscript appropriate?5. Do you think the manuscript is scientifically correct?6. Are the references sufficient and recent? If you have suggestions for additional references, please mention them in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none">1. Yes, the article is important for the scientific community.2. Yes.3. Yes4. Yes5. A little more information about the equation under consideration should be given. Both the introduction and the references can be presented in a richer way by mentioning the work done on different types of equations. I suggest the following reference to help the authors in this direction: https://doi.org/10.1016/j.joes.2022.06.007 https://doi.org/10.1002/mma.9762 https://doi.org/10.1007/s11082-022-03561-7	
<p><u>Minor</u> REVISION comments</p> <ol style="list-style-type: none">1. Is the language/English quality of the article suitable for scholarly communications?	<p>Yes. The entire article should be re-read, and some punctuation errors should be corrected.</p>	

<p>Optional comments</p>	<p>It is recommended that the authors provide more background on the equation under study, e.g., what methods have been used to study the equation, what conclusions have been obtained, etc. What problem was studied, and why is it important?</p> <p>A conclusion can be added.</p> <p>What has been done can be summarized and presented. What is the main contribution? It should be marked in the introduction and conclusion in detail. What are the advantages of this study, and how will this study be helpful and fill the gap in the current research? What does the current paper add to the subject area compared with other published studies?</p> <p>The authors should carefully review and arrange the references by the journal's format.</p> <p>The authors should double-check the mathematical formulations.</p> <p>Also, A sub-section such as notation and preliminaries could be offered. You should double-check the mathematical formulations.</p>
