Compulsory REVISION comments		
1. Is the manuscript important for the scientific community? (Please write a few sentences on this manuscript)	Yes, it was very valuable because as we know chronic illnesses are increasing every day all over the world, especially HTN is a silent killer it needs to be studied further not only epidemiology it needs digitalization including machine learning. Therefore the manuscript was very important for the scientific community	
2. Is the title of the article suitable? (If not please suggest an alternative title)	No, the title needs rewriting for me I recommend this << utilization of facial PPG signals as a novel source for blood pressure estimation >>. Because the existing topic doesn't show the exact objective of the manuscript.	
3. Is the abstract of the article comprehensive?	Yes. It was comprehensive	
4. Are subsections and structure of the manuscript appropriate?	Yes. They were appropriate but need minor revisions like grammar and typographical corrections, especially on BP calculation steps	
5. Do you think the manuscript is scientifically correct?	Yes.	

<p>6. Are the references sufficient and recent? If you have suggestions for additional references, please mention them in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The listed references were recent but they are not enough for one abstract, as far as my knowledge one abstract needs to have at least 20-25 references.</p>	
<p>Minor REVISION comments</p> <p>1. Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Yes. It was but needs some grammatical corrections in the whole document</p>	
<p>Optional comments</p>	<p>Better to increase the font size of the figures</p>
