If you have suggestions for additional references, please mention them in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>-The manuscript is important for scientific community in terms of improving food security using technology to enhance agricultural productivity</p> <p>-The title is suitable but the author may need to include the location of the study, that is the region or country where the study was undertaken</p> <p>-The abstract is well written and comprehensive although the location of study needs to be captured under this</p> <p>-Being a review paper, it has a different a totally different structure from the usual manuscript. Its ok as it is for a review paper</p> <p>-The manuscript is scientifically correct and sound</p> <p>-The references are sufficient</p> <p>-The manuscript is good however the major shortcoming is that it is just too general on the use of GIS to improve agriculture in terms of soil fertility and precision agriculture. The problem is that it is not clear where this study is being undertaken. Are there other examples of actual studies on these aspects undertaken by the author which could be included in the manuscript to strengthen it</p>
