Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestions for additional references, please mention them in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The study examines the social adaptation of university students who migrated from rural to urban areas in Kyrgyzstan. So, this study is just done on a specific population.</p> <p>No. The title is misleading as it suggests that it is a case study but the manuscript has survey method used.</p> <p>No. The scientific way of writing is missing.</p> <p>Yes. The subsections and structure of the manuscript is fine. Purpose of the research can be better written as Research Objectives.</p> <p>No. The manuscript has many points missing. At some instances very basic details are given. At other points important and required information are missing.</p> <p>No. The very less references are related to topic. Others are related to various topics.</p> <p>Overall, the quality of the paper is poor and need substantial improvements.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is the language/English quality of the article suitable for scholarly communications? 	<p>No, the quality of English is poor and not suitable for scientific communications. The manuscript is written in a form more suitable for newspaper article. The topics discussed go beyond the topic of the manuscript specially in Introduction and Theoretical background.</p>	
<p>Optional comments</p>
