Is the title of the article suitable? (If not please suggest an alternative title)3. Is the abstract of the article comprehensive?4. Are subsections and structure of the manuscript appropriate?5. Do you think the manuscript is scientifically correct?6. Are the references sufficient and recent? If you have suggestions for additional references, please mention them in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Thank you for giving me the opportunity to review paper for your reputed Journal.</p> <p>Comments to the Author: The English translation needs improvement as it contains several typos and grammatical errors. Please explaining about A systematic random sampling method Please explaining about the varieties ED was mild , moderate type and severe</p> <p>Result :Please explaining about Effect size in table 2 Explanation of the tables is incomplete.</p> <p>Discussion: the discussion section is quite brief. It would be beneficial to enhance the discussion section by offering a detailed analysis of this study's strengths and limitations, particularly in comparison with prior research .I suggest expanding this section and explaining about possible mechanisms in the perceived stress and ED. It would be beneficial to enhance the discussion section by offering a detailed analysis of this study's strengths and limitations, particularly in comparison with prior research.</p> <p>Conclusion: be revised It should be written in a general and textual way, not the same findings</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none">1. Is the language/English quality of the article suitable for scholarly communications?
