

Journal Name:	Journal of Basic and Applied Research international
Manuscript Number:	Ms_JOBARI_12260
Title of the Manuscript:	DEVELOPMENT AND ANALYSIS OF MULTIGRAIN FUNCTIONAL BAKERY PRODUCTS
Type of the Article	Research paper

General guideline:

This journal believes that no manuscript should be rejected only based on 'lack of Novelty', provided the manuscript is sufficiently robust and technically sound. Too often a journal's decision to publish a paper is dominated by what the Editor/reviewer thinks is interesting and will gain greater readership - both of which are subjective judgments and lead to decisions which are frustrating and delay the publication. This journal will rigorously peer-review your submissions and publish all papers that are judged to be technically sound.

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Is the manuscript important for scientific community? <i>(Please write few sentences regarding this manuscript to justify your answer)</i>	The manuscript investigated the preparation, composition, and product evaluation of the multigrain-functional breads including bun, bread, muffin. It provides important references of nutritional and health benefits of these foods for bakery industry. Moreover, it offers key insights into the development of multigrain-functional foods.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, it's reasonable and acceptable.	
Is the abstract of the article comprehensive?	The abstract of this manuscript is comprehensive, but concise. The authors should re-write the abstract to make it clear to read.	
Are subsections and structure of the manuscript appropriate?	No, there are some subsections like introduction, Design/methodology/approach, Findings and so forth, which I think is not appropriate for readers to understand. And each subsections titles should be highlighted. The authors should re-organise the manuscript structures.	
Do you think the manuscript is scientifically correct? <i>(Please write few sentences regarding this manuscript to justify your answer)</i>	Not enough. The data in the table and figure lacks the standard errors. Each assay should be performed in three repeated times to make the results scientific and credible. The figures could be re-drawn using commercial software to make it beautiful.	
Are the references sufficient and recent? If you have suggestion of additional	The references are not sufficient and recent. The introduction and discussion should cover more latest studies.	

references, please mention in the review form.	<p>Addition references for authors: Kumar, L.R.G., Sanath Kumar, H., Tejpal, C.S. et al. Exploring the physical and quality attributes of muffins incorporated with microencapsulated squalene as a functional food additive.
