Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Coriander is a major spice crop cultivated widely in different parts of India. India is the largest producer and exporter of coriander in the world. Among various biotic factors, insect pests such as coriander aphids and seed midge cause major damage. They cause 40-70 percent yield loss in case of severe infestations. The knowledge of the seasonal incidence and correlation of the population of such pests and associated natural enemies helps in their management. So, the manuscript is important for the scientific community.
