

I. K. Press

Journal Name:	<u>PLANT CELL BIOTECHNOLOGY AND MOLECULAR BIOLOGY</u>
Manuscript Number:	Original_Manuscript_PCBMB_12165
Title of the Manuscript:	“Impact of standardizing macro-nutrient (Nitrogen) requirement in newly released potato (<i>Solanum tuberosum</i> L.) var. Kufri Neelkanth”
Type of the Article	

General guideline:

This journal believes that no manuscript should be rejected only based on ‘lack of Novelty’, provided the manuscript is sufficiently robust and technically sound. Too often a journal's decision to publish a paper is dominated by what the Editor/reviewer thinks is interesting and will gain greater readership - both of which are subjective judgments and lead to decisions which are frustrating and delay the publication. This journal will rigorously peer-review your submissions and publish all papers that are judged to be technically sound.

To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

1: Review Comments

	Reviewer's comment	Author's feedback
<p><u>Compulsory</u> REVISION comments</p> <ol style="list-style-type: none">1. Is the manuscript important for the scientific community? (Please write a few sentences on this manuscript)2. Is the title of the article suitable? (If not please suggest an alternative title)3. Is the abstract of the article comprehensive?4. Are subsections and structure of the manuscript appropriate?5. Do you think the manuscript is scientifically correct?6. Are the references sufficient and recent? If you have suggestions for additional references, please mention them in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>		
<p><u>Minor</u> REVISION comments</p> <ol style="list-style-type: none">1. Is the language/English quality of the article suitable for scholarly communications?	<p>Firstly, I would like to thank the Editor for the invitation and secondly, the authors for the research carried out. The objective of the research is well defined in the introduction, where the authors intend to find the ideal level of nitrogen that facilitates the growth of tubers. There are small corrections to the English that must be made.</p>	
<p><u>Optional</u> comments</p>
