This manuscript examines the wild plants used in Purulia, West Midnapur, and Bankura for both medicinal purposes and as alternative sources of nutrition. I believe the study of these 27 wild plants offers a comprehensive summary of their uses. Most importantly, this summary will be valuable for future generations, as there is currently a lack of proper documentation on these plants and their applications, aiding in their identification.</li><li>2. The title of the article is appropriate.</li><li>3. The abstract of the article is thorough, offering a clear overview of the content and highlighting the significance of studying these wild plants for future generations</li><li>4. The subsections and the structure of the manuscript are appropriate.</li><li>5. I believe the manuscript is scientifically accurate. It provides a detailed explanation of the data collection methods, the study area, and the results, which are clearly explained and effectively presented through tables and graphs.</li><li>6. Yes, the references are sufficient and recent.</li></ol>	<p>The revised manuscript has been done according to the reviewers comments.</p>
<p><b><u>Minor</u></b> REVISION comments</p> <ol style="list-style-type: none"><li>1. <b>Is the language/English quality of the article suitable for scholarly</b></li></ol>	<p>Yes, the use of English in the article is appropriate for academic communication. However, the punctuation needs to be reviewed.</p>	<p>Thank you</p>
