This manuscript examines the wild plants used in Purulia, West Midnapur, and Bankura for both medicinal purposes and as alternative sources of nutrition. I believe the study of these 27 wild plants offers a comprehensive summary of their uses. Most importantly, this summary will be valuable for future generations, as there is currently a lack of proper documentation on these plants and their applications, aiding in their identification.2. The title of the article is appropriate.3. The abstract of the article is thorough, offering a clear overview of the content and highlighting the significance of studying these wild plants for future generations4. The subsections and the structure of the manuscript are appropriate.5. I believe the manuscript is scientifically accurate. It provides a detailed explanation of the data collection methods, the study area, and the results, which are clearly explained and effectively presented through tables and graphs.6. Yes, the references are sufficient and recent.
