

I. K. Press

Journal Name:	<u>PLANT CELL BIOTECHNOLOGY AND MOLECULAR BIOLOGY</u>
Manuscript Number:	Ms_PCBMB_12180
Title of the Manuscript:	Analysis of Genetic Variability, Correlation and Path Coefficient of yield components and its attributing traits for hastening improvement of Kodo millet (<i>Paspalum scrobiculatum</i> L.)
Type of the Article	

General guideline:

This journal believes that no manuscript should be rejected only based on 'lack of Novelty', provided the manuscript is sufficiently robust and technically sound. Too often a journal's decision to publish a paper is dominated by what the Editor/reviewer thinks is interesting and will gain greater readership - both of which are subjective judgments and lead to decisions which are frustrating and delay the publication. This journal will rigorously peer-review your submissions and publish all papers that are judged to be technically sound.

To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

1: Review Comments

	Reviewer's comment	Author's feedback
<p><u>Compulsory</u> REVISION comments</p> <ol style="list-style-type: none">1. Is the manuscript important for the scientific community? (Please write a few sentences on this manuscript)2. Is the title of the article suitable? (If not please suggest an alternative title)3. Is the abstract of the article comprehensive?4. Are subsections and structure of the manuscript appropriate?5. Do you think the manuscript is scientifically correct?6. Are the references sufficient and recent? If you have suggestions for additional references, please mention them in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The manuscript entails the Genetic Variability, Correlation and Path Coefficient of yield and other agronomic traits of Kodo millet. The study is important for further improvement of kodo millet and usefulness in breeding program.</p> <p>I have made few changes on the title to reflect the work done appropriately.</p> <p>Okay</p> <p>The abstract is deficient in lots of information such as an introductory statement about kodo millet, justification of the study, data analysis and interpretation of the results obtained.</p> <p>The estimation of heritability of traits and genetic advance in a single season of evaluation in just a single environment will not give a meaningful result.</p>	
<p><u>Minor</u> REVISION comments</p> <ol style="list-style-type: none">1. Is the language/English quality of the article suitable for scholarly communications?	<p>English check is required. Most of the paragraphs are redundant.</p>	
<p><u>Optional</u> comments</p>
