

Editor's Comment:

Manuscript is accepted for publication.

However, please take care of grammatical/ language errors.

I am of the opinion that the following last couple of sentences:

'All the bacteria species were positive to pathogenicity test except Enterobacter aerogenes, which test negative. In conclusion, this study provides valuable insights into the bacterial diversity associated with the spoilage of golden melon in Zuba and Gwarinpa markets. The findings underscore the importance of implementing proper hygiene and storage practices to minimize microbial contamination and extend the shelf life of golden melon'
