

Journal Name: [Asian Journal of Plant and Soil Sciences](#)
Manuscript Number: Ms_AJOPSS_12580
Title of the Manuscript: **Ethnobotanical Assessment of Wild and Semi-Wild Edible Plants in Northwestern Tigray, Ethiopia**
Type of the Article: **Original Research Article**

General guideline:

This journal believes that no manuscript should be rejected only based on ‘lack of Novelty’, provided the manuscript is sufficiently robust and technically sound. Too often a journal's decision to publish a paper is dominated by what the Editor/reviewer thinks is interesting and will gain greater readership - both of which are subjective judgments and lead to decisions which are frustrating and delay the publication. This journal will rigorously peer-review your submissions and publish all papers that are judged to be technically sound.

To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (<i>Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here</i>)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	I like this manuscript because the assessment of wild plants and fruit is very necessary for growing population and its awareness.	

J. K. Press

Is the title of the article suitable? (If not please suggest an alternative title)	In title the author used wild and semi wild plant, but in research paper the list of plants shows all plants species are fruits. Instead of wild and semi wild plants use wild fruits in Northwestern Tigray, Ethiopia.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is large, delete the.. Overconsumption of certain fruits can lead to side effects such as abdominal bloating, nausea, heart disease, constipation, and urinary discomfort. Children were the primary collectors and sellers of these plants, using methods like plucking or long sticks for harvesting.	
Are subsections and structure of the manuscript appropriate?	Ok	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	In table 3 use Botanical name instead of Scientific name. In Botanical name use authority e.g <i>Hyphaene thebaica</i> (L.) Mart.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	OK	

J. K. Press

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	OK	
Optional/General comments
