PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This study highlights the importance of weather parameters in influencing thrips populations in tomato. Relations with weather factors like humidity, temperature, evaporation, and wind speed indicate their strong influence on pest dynamics. The findings can guide the development of weather-based pest management strategies. Understanding these relationships is vital for optimizing pest control and ensuring sustainable tomato production.
