**PART 1: Comments**

	<b>Reviewer's comment</b>	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	The topics covered in the manuscript are quite relevant from a scientific and practical point of view. At the same time, there is a discrepancy between the title of the article and its content (described in the comments). This discrepancy somewhat devalues the manuscript, as it introduces some ambiguity in what the author (authors) wanted to say. The lack of discussion of the findings does not allow me to talk about comparing this article with others.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	The title implies a national scale, but the content describes a scale one level lower - the scale of economies (healthcare, education, banking, etc. / possibly except for the "National Security and Policy" section). Therefore, the title must be changed to something that shows economic development, but not national development. Or, the text of the article must be brought to the scale of describing national development. This article is a review, so the word "review" must be present in the title.	

<p><b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>	<p>The abstract is comprehensive.</p>	
<p><b>Is the manuscript scientifically, correct? Please write here.</b></p>	<p>No, the manuscript has flaws that must be eliminated. Structural problems include:  1) Absence of research questions. The Abstract says “This research concludes that by ensuring balanced policies, AI can contribute to sustainable, inclusive national growth that supports economic progress and enhances social welfare.” However, this statement is not discussed in the paper enough;  2) The methodology is absent. How the research was carried out? It must be added;  3) There is no discussion of findings. No alternatives to the findings were presented;</p> <p>At the same time elements of mentioned sections are presented in the text. So, may be restructurization of the text with some corrections will be enough.</p> <p>Some conceptions such as sustainability and society (information society) should be explained/mentioned.</p> <p>An explanation of the conception of “National” must be presented with a reference to the proper source if the author(s) decides to keep the title of the paper but correct the text.</p>	
<p><b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b></p>	<p>The references are recent (a number of papers dated 2024). The problem that the paper does not show the scale of the national development exists, so additional references may be needed.</p> <p>I recommend the author(s) consider reading/including the following sources (this literature including their references could help to raise the level of scale of the paper):</p> <p>1) Reference to UN Goals of Sustainable Development:  “United Nations, 17 Goals of Sustainable Development”, <a href="https://sdgs.un.org/goals">https://sdgs.un.org/goals</a></p> <p>2) “A Look at Evolution of Teams, Society, Smart Cities, and Information Systems based on Patterns of Primary, Adaptable, Information, and Creative Society”, <a href="http://dx.doi.org/10.15439/2022F34">http://dx.doi.org/10.15439/2022F34</a></p>	

	<p>3) "Societal Patterns Evolution Model in Development of Economy, Society, and Environment",  <a href="http://dx.doi.org/10.57017/jorit.v2.2(4).03">http://dx.doi.org/10.57017/jorit.v2.2(4).03</a></p> <p>4) "A Look to Model of Society and Teams Development Based on Initial Formation, Primary, Adaptable, Information, and Creative Society Patterns",  <a href="http://dx.doi.org/10.51483/IJMRE.3.1.2023.36-56">http://dx.doi.org/10.51483/IJMRE.3.1.2023.36-56</a></p>	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	No problems with English detected.	
<b>Optional/General</b> comments		

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
